

Presentation Rules

ICSES'08

Presentation

General

The program of the conference is divided into plenary sessions with invited speakers and two types of parallel sessions (S & R) as well as poster sessions in accordance with discussed topics.

The language of the Conference is English, neither translation nor interpretation will be provided.

Equipment

The conference rooms will be equipped with a computer, multimedia projector and transparency projector. For computer presentation we provide MS PowerPoint, and PDF Acrobat Reader.

Since using authors' own computers causes too many technical problems and breaks please do not plan to use your own laptop. Instead please prepare your presentation in electronic form (MS Power Point, Adobe PDF) and arrive to the assigned lecture room with reasonable advance (a quarter hour prior to the scheduled start of the session is absolute minimum) to copy your files for screen presentation. The same apply also for short presentations for the introduction to the poster sessions!

Time of the presentations

Invited plenary papers: 40min + 10min for discussion

Regular "S" papers: 15min for presentation + 5min for discussion

Regular "R" papers: 12min for presentation + 3min for discussion

Posters

The authors presenting their papers in the poster form will have at their disposal a panel of 120cm x 120 cm. Sticking materials (double-side adhesive tape will be provided by organisers).

Poster sessions will also be preceded by short introduction - the authors are asked to present their work very shortly in front of the audience using 2-5 slides, within not longer than 3 minutes. The questions and discussions will be continued at the poster panels.
